Total

\$641.19

Product/Service	Description	Qty.	Unit Price	Total
Existing Switch-Box Removal and Wiring Identification	Remove the existing devices from the two-gang switch box. Disconnect and label all wiring for proper reconnection. Carefully cut and remove the existing plastic box without damaging the concealed wiring or surrounding finished wall. Temporarily protect and secure the wiring. Enlarge the wall opening to accommodate a new three-gang switch box.	1	\$280.00	\$280.00
New Wiring, Conduit and Attic Junction Box	Fish new switch wiring from the switch-box opening into the attic space. Route the wiring through the attic to a new accessible junction-box location near the attic access. Install approximately 6 feet of 1/2-inch flexible conduit from the attic junction box to the approved art location. Provide a pull line inside the conduit for the artist's future wiring. Install a metal 4-inch square junction box in the attic. Terminate the flexible conduit and new switch wiring within the junction box. Install a listed cover and maintain permanent access to the attic junction box.	1	\$120.00	\$120.00
Three-Gang Box, Make Up Wiring and Final Devices	Install the new three-gang switch box. Make up and reconnect all existing and new switch wiring. Reinstall the existing switches and install the additional switch. Install a new three-gang wall plate. Test all switches and affected lighting for proper operation.	1	\$180.00	\$180.00

Subtotal	\$580.00
Seattle (10.55%)	\$61.19
Total	\$641.19
